

Claims

1. A control unit for use in a window blind head rail assembly comprising;  
a sprocket wheel,  
5 a chain guard housing,  
a sprocket support and wrap spring,  
a splined bush for engagement with a roller blind tube and  
a centre pin, wherein the centre pin comprises a centre-pin head and a  
body, the centre-pin head including one or more fins adapted to co-  
10 operatively engage with one or more recesses in the sprocket support.
2. The control unit of claim 1 wherein the centre-pin head comprises three  
fins.
- 15 3. The control unit of claim 1 or claim 2 wherein there are one or more  
lugs extending perpendicular to the face of the control unit.
4. The control unit of claim 3 wherein the lug or lugs are part of the chain  
guard housing.
- 20 5. The control unit of any preceding claim wherein the wrap spring is of  
circular cross-section and the wrap spring juts have one or more  
flattened surfaces.
- 25 6. A control unit for use in a window blind head rail assembly comprising;  
a sprocket wheel,  
a chain guard housing which may be rotated relative to an external face  
of a sprocket support,  
a sprocket support and wrap spring,  
30 a splined bush for engagement with the roller blind tube and  
a centre pin.

7. A control unit for use in a window blind head rail assembly comprising;  
a sprocket wheel,  
a chain guard housing comprising one or more lugs extending  
5 perpendicular to the face of the control unit,  
a sprocket support and wrap spring,  
a splined bush for engagement with the roller blind tube and  
a centre pin.
- 10 8. A control unit for use in a window blind head rail assembly comprising;  
a sprocket wheel,  
a chain guard housing,  
a sprocket support,  
a wrap spring wherein the wrap spring juts have one or more flattened  
15 surfaces,  
a splined bush for engagement with the roller blind tube and  
a centre pin.
- 20 9. A metal or plastic bracket adapted to receive the control unit of any  
preceding claim.
